DETAILED ACTION

Allowable Subject Matter

1. Claims 6 and 8-24 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singly or in combination, fails to disclose the limitations of:

oxidizing the silicon semiconductor substrate locally in a dry environment at a first temperature of from about 1200 to 1300 degrees centigrade, through the patterned silicon nitride mask layer to form silicon oxide dielectric field oxide (FOX) isolation layers which prevent out-diffusion of nitrogen species from the silicon nitride mask layer; and then oxidizing the silicon semiconductor substrate in a dry environment further at a second temperature from about 950 to 1000 degrees centigrade as desired to form greater thickness of silicon oxide layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron E Pompey whose telephone number is (571) 272-

1680.
